**Japan Digital Therapeutics Consortium is Integrated into
Japan Digital Health Alliance for Further Development**

**~Launching policy recommendations for developing the digital health industry and a cross-sectoral
research organization that transcends industry boundaries to disseminate information~**

Japan Digital Therapeutics Consortium will integrate the alliance into Japan Digital Health Alliance on March 14, 2022, in order to promote the industry as a comprehensive and more extensive organization in digital health, which is becoming more important under the new normal life.

Japan Digital Therapeutics Consortium began its activities in October 2019 and has been promoting the digital therapeutics (DTx) industry in Japan. It supports the supervision of white papers published by The Japan Research Institute, Limited, as well as complies industry opinions on the 2022 revision of medical fees.

As Japan Digital Health Alliance, we keep contributing to developing the Digital Health Industry.
