

# Digital Garage Group Environmental Policy

## Basic Philosophy

Our Group contributes to the realization of a sustainable society by "Designing 'New Context' for a sustainable society with technology," which we have established as our purpose. We will continue to create new contexts where affluent society and environment can harmonize, while reducing environmental impact through the power of technology.

## Action Guidelines

### 1. Practice of Environmental Contribution Through Business

We contribute to solving environmental issues such as climate change and biodiversity through the provision of innovative solutions and services utilizing the power of technology, and through collaboration with business partners.

### 2. Compliance with Environmental Laws and Regulations

We comply with environmental laws and regulations, and local ordinances and agreements, and take appropriate measures.

### 3. Continuous Information Disclosure

We strive to ensure transparency through continuous information disclosure.

### 4. Fostering Environmental Awareness

We will promote awareness-raising and educational activities related to the environment and strive to improve awareness.
